

Razorback Railway - RBR Demo

The “living railway”! Register with the Razorback website and get a constant stream of well-developed activities that track your progress. Think of it as a Driver career where your performance determines the tasks you are set!

TRS2006 includes three scenarios from Razorback Railway which give you a taste of what is available.

“Apollo Bay” eases you into the world of Razorback, with a leisurely run down to the sea shore. Keep to the timetable and try not to speed. Your performance is charted and graphed to let you know how you measure up!

“Yard Mess” puts you in charge of cleaning up the Altona rail yard. The previous shift left the yard in chaos, now it’s up to you to clean it up! This clever shunting puzzle requires you to maneuver through the crowded rail yard to construct a passenger consist.

“Shunting 101” tasks you with constructing two passenger consists using the vacant cars in your rail yard. Remember that the guard van must be located at the end of the consist. Make sure to stay within your yard, and be careful not to stray out onto the heavily trafficked main line.

Razorback Railway continues to deliver ever new activities and scenarios to its users. You can visit the “living railway” at www.razorbackrailway.com.

Best Features:

- Entertaining “Shunting Puzzles”
- Test your driving skills and receive detailed statistics on your performance
- HUGE route with over 240km of track
